Unfortunately, all the major industries in Ulhasnagar have been declared as sick/closed industries, which results in declining growth of industrial development. Out of the Various Industries, Century Rayon Company is the only surviving company, which is known for providing employment to around 6,000 persons, working 24 hrs. in 3 shifts generating production of 70 tons of thread per day. Further by generating an amount of Rs. 10, 00, 00,000/- (Rupees Ten Crores) every year towards the Property Tax and Local Body Tax, Contributes to revenue of the Ulhasnagar Municipal Corporation. Not only this, but Company also owns two Acid Plants from which gases like H₂SO₄ and CS₂ are produced. In the prevailing scenario, if the Reservation No. 1 and 2 are modified to be used for Residential purposes which are adjacent to the Century Rayon Company, the smoke/poisonous gases released from the Company will have a harmful effect on the public at large. As a result, The Company will be compelled to be closed leading to huge loss, damage, unemployment and injury to the lives of people in general. The Corporation also will be facing with huge economic loss.

3) Area of Amar Dye Company be kept for water treatment and purification plant Justification for water treatment plant

- a. There is an acute shortage of land in Ulhasnagar for the purpose of installation of water purification and Treatment plant
 - b. The river Ulhas is adjacent to Amer Dye Company and the same will be technically viable to serve the purpose of plant.
 - c. Water being an inevitable and utmost basic need, it is moral duty of the corporation provide clean and purified water to the citizen of Ulhasnagar

5 Modifications to Published DP Plan

1. Reservation No. 1 be kept for Recreational open space (Indoor/Outdoor Sports facility) except 10,000 sq.mtrs on the bank of river reserved for cremation ground, 10000 sq mtrs for children burial ground since there is no cremation ground in entire camp No.1 and area admeasuring 5000 sq mtrs be kept slaughter house

2.Reservation No. 2 to be kept for recreation open space.

Unfortunately, all the major industries in Ulhasnagar have been declared as sick/closed industries, which results in declining growth of industrial development. Out of the Various Industries, Century Rayon Company is the only surviving company, which is known for providing employment to around 6,000 persons, working 24 hrs. in 3 shifts generating production of 70 tons of thread per day. Further by generating an amount of Rs. 10, 00, 00,000/- (Rupees Ten Crores) every year towards the Property Tax and Local Body Tax,

Contributes to revenue of the Ulhasnagar Municipal Corporation. Not only this, but Company also owns two Acid Plants from which gases like H_2SO_4 and CS_2 are produced. In the prevailing scenario, if the Reservation No. 1 and 2 are modified to be used for Residential purposes which are adjacent to the Century Rayon Company, the smoke/poisonous gases released from the Company will have a harmful effect on the public at large. As a result, The Company will be compelled to be closed leading to huge loss, damage, unemployment and injury to the lives of people in general. The Corporation also will be facing with huge economic loss.

3) Area of Amar Dye Company be kept for water treatment and purification plant
Justification for water treatment plant

- d. There is an acute shortage of land in Ulhasnagar for the purpose of installation of water purification and Treatment plant
 - e. The river Ulhas is adjacent to Amer Dye Company and the same will be technically viable to serve the purpose of plant.
 - f. Water being an inevitable and utmost basic need, it is moral duty of the corporation provide clean and purified water to the citizen of Ulhasnagar
